## Objective

---

Detail-oriented Quality Assurance professional with over 3 years of experience in manual testing, API validation, and cross-platform quality control. Expert in identifying complex bugs and ensuring seamless user experiences across web and mobile applications.

## Experience

---

**Quality Assurance(QA), Bitnet infotech** 10/2024 – Present  
Rajkot, Gujarat

- **Project:** Abroad Study Exam Website (PTE/IELTS/Language Cert).
- Performed end-to-end testing for a multi-role platform (Super Admin, Trainer, Student), ensuring strict role-based access control.
- Validated manual scoring and real-time result updates for Trainer Mode across Web, Android and iOS.
- Identified and tracked complex defects using GitLab & ClickUp, contributing to a 15%+ increase in build stability prior to production releases.
- Executed cross-browser and responsive testing on desktop, tablet, and mobile devices.

**QA Tester, DI Solutions** 11/2022 – 03/2024  
Surat, Gujarat

- Conducted API testing using Postman to validate backend services and data integrity.
- Logged and tracked defects in JIRA, collaborating with developers and analysts to ensure swift resolution.
- Authored detailed test cases based on user stories and business requirements.
- Actively participated in daily stand-ups, sprint planning, and retrospectives within an Agile environment.

**QA manual tester, Kvalitat Technologies LLP** 08/2022 – 09/2022

- Completed a 2-month intensive training program in Manual Testing, mastering test case development, scenario creation, and defect logging methodologies."
- Gained foundational experience using QA tools including Azure DevOps, Postman, BrowserStack, and TestRail to support test execution."

## Education

---

**Bachelor of Engineering in Electronics and Communication,** 07/2019 – 07/2022  
Gujarat Technological University  
7.88 CGPA

**Diploma in Electronics and Communication, Gujarat Technological University** 07/2016 – 07/2019  
6.4 CGPA

## Skills

---

### Core Competencies

**Testing Methodologies:** SDLC, STLC, Agile/Scrum, Smoke, Functional, Integration, System, Regression, UAT

### Tools:

JIRA, GitLab, ClickUp, GitLab, Azure DevOps, TestRail, Postman, Trello, BrowserStack.

### Technical Skills:

Manual Testing, API Testing (Postman), UI/UX Testing, Cross-Browser & Responsive Testing.

### Documentation

Test Plans, Test Cases, Requirement Traceability Matrix (RTM), Bug Reports, Requirement Analysis.

## Projects

---

### Abroad exam website, *Project Overview*

- **Project Overview:** A comprehensive web-based PTE and IELTS language testing platform featuring multi-role access (Super Admin, Partner, White Label Users, Trainers, and Students).
- **Key Details & Responsibilities:** \* Executed end-to-end manual, cross-browser, and responsive testing across desktop, tablet, and mobile (Android & iOS).
- Validated strict, role-based access controls and panel configurations (e.g., system-wide configurations for Super Admin, white-label and data management for Partners, and test scheduling for Users).
- Tested Trainer Mode functionality specifically for manual scoring, feedback input, and real-time result synchronization.
- Logged, documented, and tracked bugs in close collaboration with developers.

**Transportation Website, *Project Description:*** Implemented a comprehensive container management system with real-time tracking and multi-panel access for different user roles.

- **Project Overview:** A comprehensive container management system featuring real-time tracking and multi-panel database synchronization.
- **Key Details & Responsibilities:**
- Developed and executed automated test scripts using **Selenium** specifically for the container booking module.
- Focused on **performance testing** to evaluate system responsiveness under heavy traffic and large data loads.
- Led testing for the **live location tracking** feature to ensure real-time accuracy.
- Validated data synchronization between multiple panels (Admin, Documentation, Marketing) and the central database.
- Facilitated **User Acceptance Testing (UAT)** with key stakeholders to validate business requirements.

**Scuba Diving Application, *Project Description:*** Developed a system to track various scuba diving metrics like depth, pressure, and temperature using devices like Universal Pro and Diveroid Mini, integrated with mobile applications.

- **Project Overview:** A specialized system integrated with mobile applications to track scuba diving metrics (depth, pressure, temperature) using hardware devices like Universal Pro and Diveroid Mini.
- **Key Details & Responsibilities:**
- Analyzed complex business requirements to prepare detailed test plans and scenarios.
- Led the creation of test cases specifically for **mobile hardware integration** with scuba diving equipment to ensure seamless connectivity.
- Conducted Integration, System, and device compatibility testing.
- Managed end-to-end testing activities, including defect tracking and prioritization using **JIRA**.
